PROFESSIONAL SUMMARY

I'm a BCA student and tech enthusiast who loves building software that solves real-world problems. From web apps to productivity tools, I enjoy exploring new technologies, coding creative projects, and learning through hands-on experience. I'm driven by curiosity and a passion for turning ideas into functional, impactful solutions.

EDUCATION

Higher Secondary Education (Class 12)   **2025**
Rishabh Public School   New Delhi, INDIA

Bachelors in Computer Application (BCA)   **2023-26**
JIMS UNIVERSITY   New Delhi, INDIA

WORK EXPERIENCE

Django Developer Intern,   14 June 2025 - 25 July 2025
National Informatics Centre (NIC)   Delhi, India
- Created several Django apps to support day-to-day operations.
- Defined data models and managed migrations to track and store information.
- Developed user-friendly views, templates, and RESTful API endpoints to streamline staff interactions.
- Worked alongside senior developers to troubleshoot issues and improve functionality.

PROJECTS

Recicon (Recipe-Sharing App) | React · Tailwind CSS · Firebase · Firestore
March 2025 – Present
A community-driven platform designed to empower users to discover, share, and curate recipes from around the world, featuring customizable recipe collections, collaborative meal planning tools, and social feedback mechanisms.

Not-GPT (Human-Powered Q&A Platform) | React · Supabase · Firebase Functions
July 2025 – Present
- Developing a real-time question/answer interface where users can pose queries or fetch random prompts.
- Implementing session management and routing via Supabase to balance load between human responders.
- Designing an intuitive UI for seamless topic discovery and answer submission.

Minor Projects

- Advanced Tic-Tac-Toe Game | C++ · SFML
Developed a desktop Tic-Tac-Toe application using C++ and the SFML library, featuring an AI opponent powered by the minimax algorithm, a graphical interface, and responsive controls.

- **Discord Bot ("Chotu") | Node.js · Discord.js · DiscordSRV**
Built a multifunctional bot offering music playback, server moderation (kick/ban), and custom mini-games, with Minecraft server integration via DiscordSRV to relay events directly into Discord channels.

TECHNICAL SKILLS

Languages | Python, JavaScript, C/C++, SQL
Frameworks | React, Django, Spring Boot, Flask, Angular, Express.js
Developer Tools | Git, Docker, Jenkins, Visual Studio Code, PyCharm, TravisCI, Eclipse, JIRA
Libraries | Pandas, NumPy, Matplotlib, Bootstrap, TensorFlow, jQuery, Redux
